## What is the average timeline for a new roof?

The timeline for a roofing project depends on several factors, such as the type of roof, the nature of the issues, the age of the property, and any previous work done. These variables make each roofing job unique. This is why we offer a paid comprehensive roofing inspection report – it helps us assess all the details and provide you with a more accurate estimate.

That said, there's no roofing challenge we haven't encountered or successfully resolved. Rest assured, we'll ensure your project is completed efficiently and to your satisfaction.

## Why should I choose Roofing Matters Australia for my project?

At Roofing Matters, we're not just another roofing company—we're a team of licensed professionals who take pride in delivering exceptional, long-lasting results. If you want a roof that will stand the test of time, delivered by a team of professionals who care about the quality of their work, Roofing Matters is the right partner for your project.

## How much will it cost?

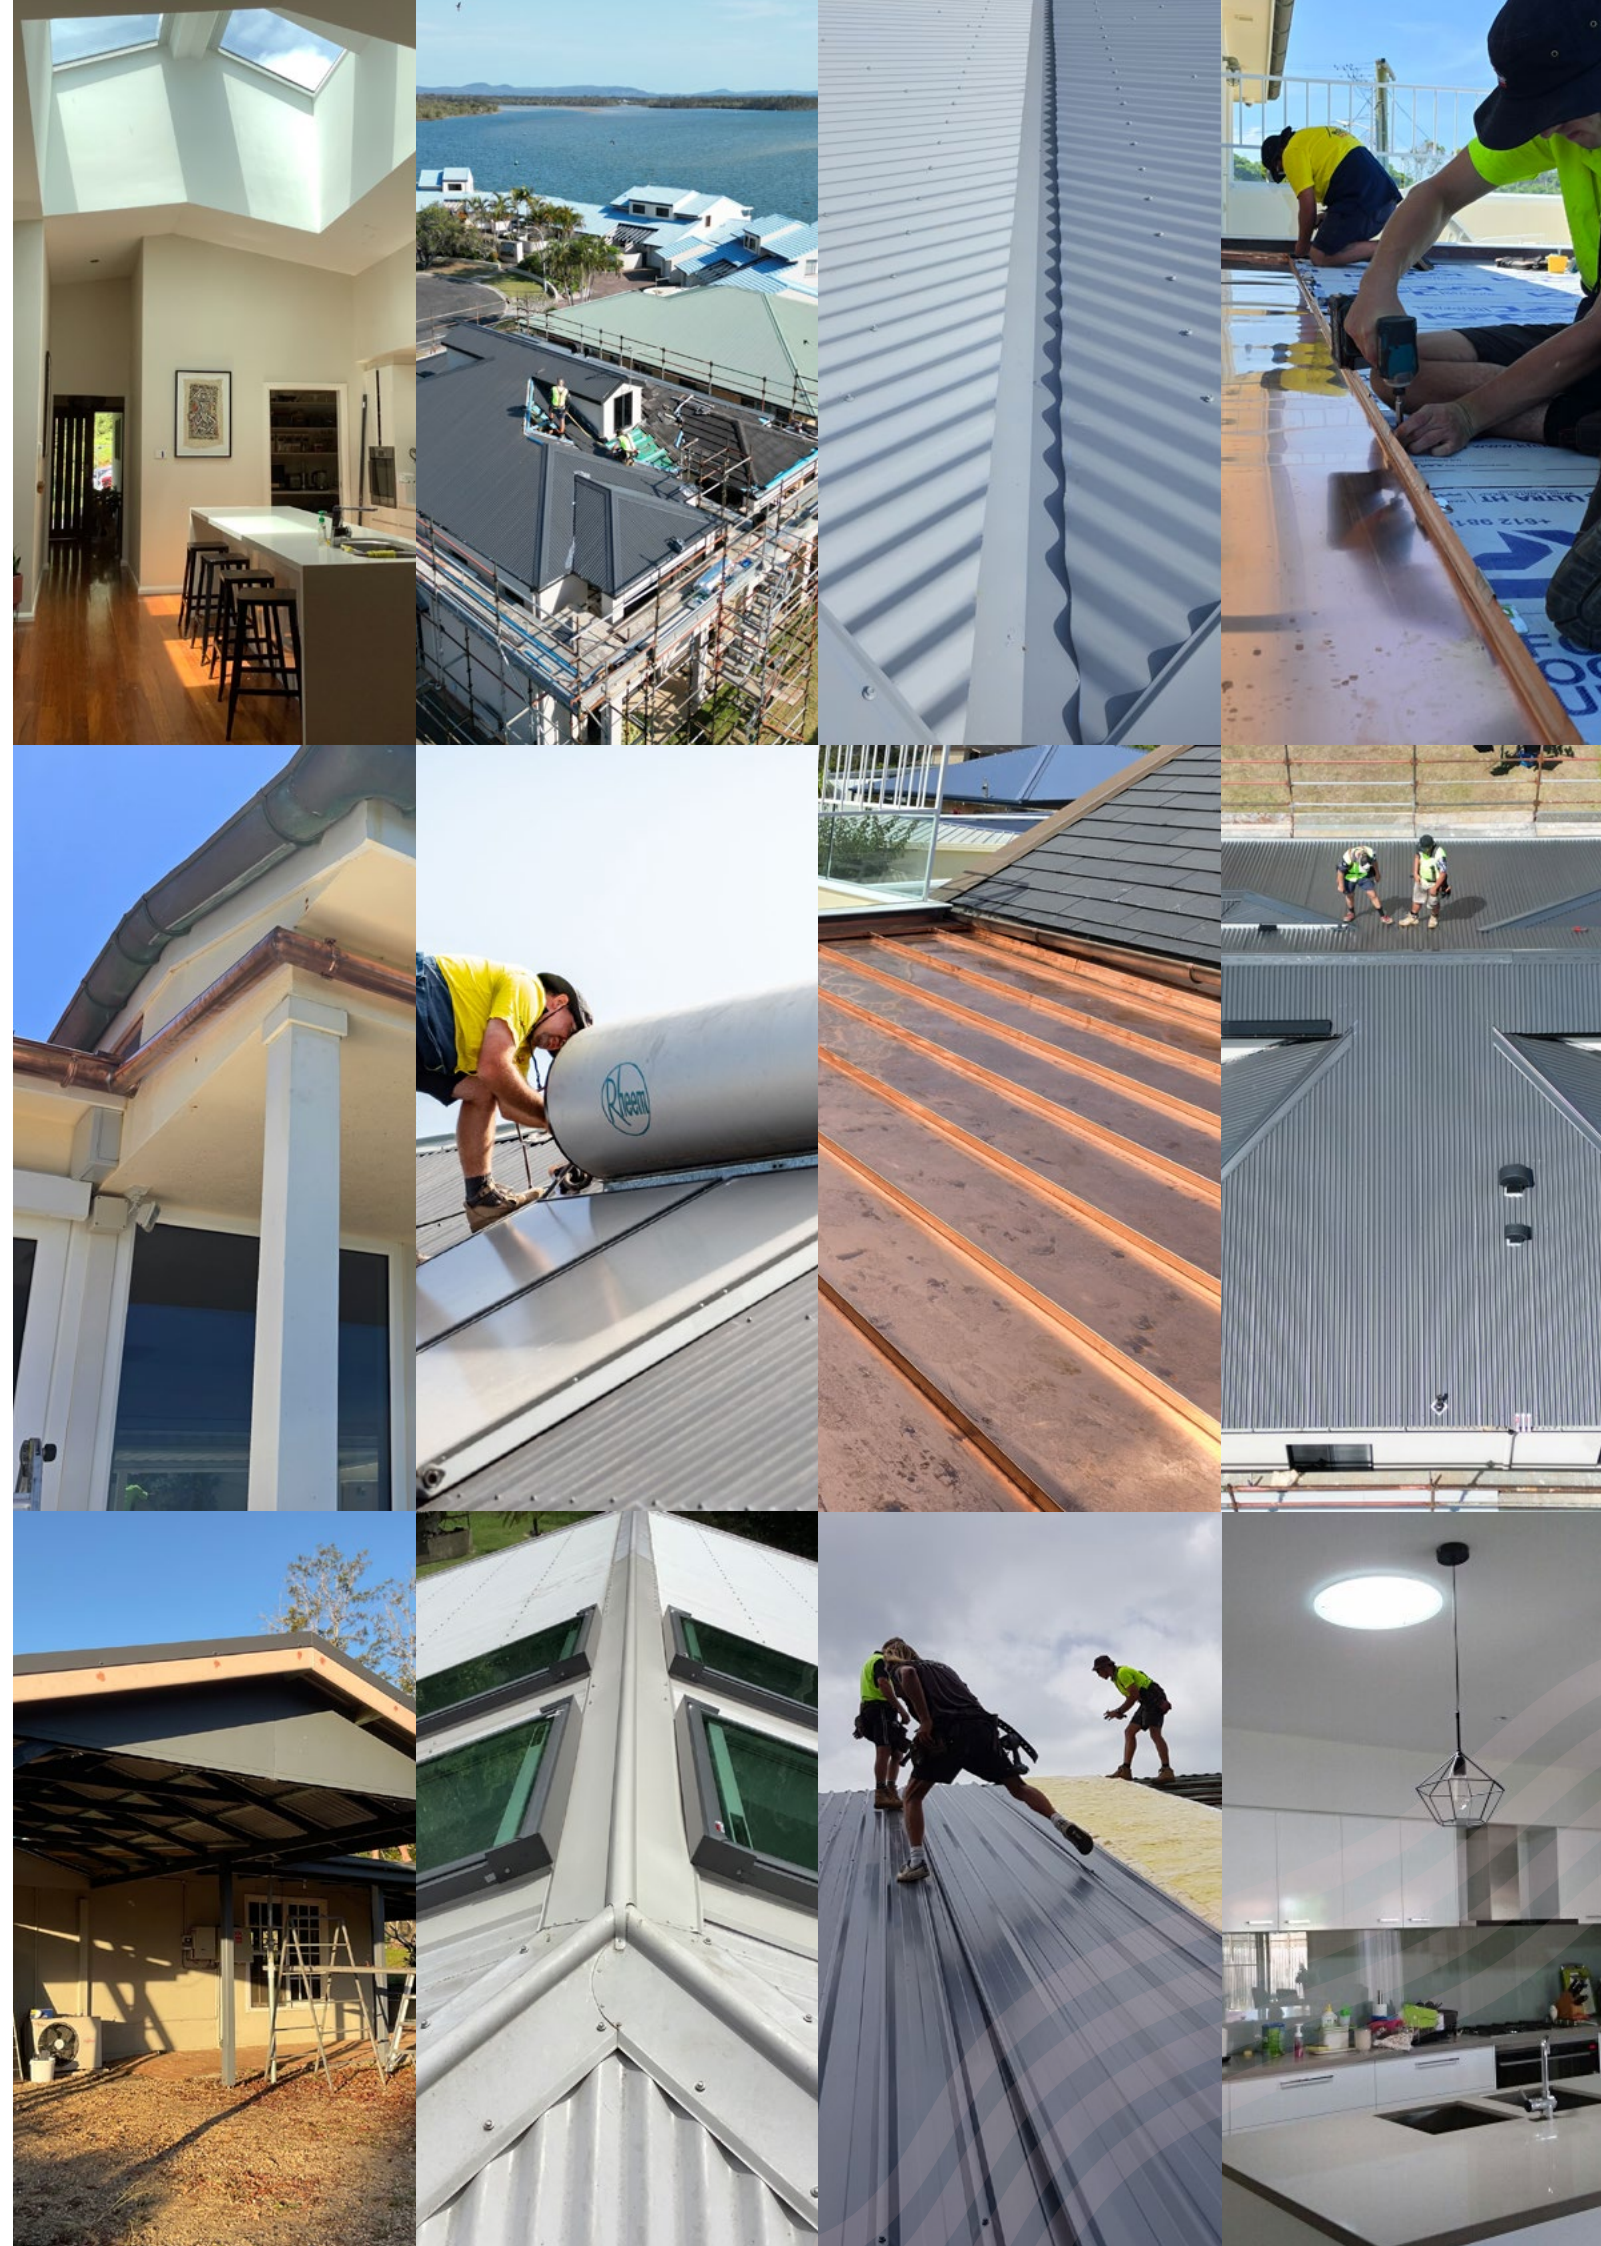

The cost of a roofing project can vary widely depending on several factors, including the type of roof, the extent of the damage, the materials used, and the size of the property. To give you an accurate estimate, we offer two options:

**Free Desktop Estimate:** We can provide you with a free desktop estimate based on information gained over a phone call and a satellite view of your property to assess roof area. At this stage this is a ballpark project estimate.

**Site Inspection & Detailed Report:** We conduct an in person site inspection, taking photos, diagnosing the problem and recommending a solution. This consultation costs \$198 and you will receive a detailed report and comprehensive proposal.

Ultimately, we aim to provide you with a clear, fair, and transparent price that matches the scope of the work required.
